Bolivar, Venezuela · [linkedin.com/in/crissacm](https://www.linkedin.com/in/crissacm) · +58 424 831 64 46 · alex.ccm7Z@gmail.com

Full Stack Developer with 6 years of experience building scalable web and mobile products. Led frontend development at LatamEarth, improving product delivery by 40% and web performance by 25%. Experienced in React, Node.js, NestJS, REST APIs, authentication, real-time systems, multi-tenant automation, and AI-powered features.

WORK HISTORY

Simplified Practice

Full Stack Developer

Dallas, TX, USA

2025 - Present

- **Architected and maintained a large-scale clinical SPA** using **React 19, Vite, and Redux**, managing approximately 1,800 components and 135 custom hooks within a modular architecture.
- **Architected and delivered an end-to-end workflow automation platform** using React Flow and NestJS, supporting event- and schedule-based triggers, conditional branches, wait steps, and actions across messaging, scheduling, billing, EHR, and CRM workflows.
- **Engineered a resilient database-per-tenant automation engine** with BullMQ, tenant-isolated job execution, idempotency controls, delayed retries, communication compliance rules, and granular execution tracking.
- **Built an AI-powered custom reporting platform** that translates natural-language requests into validated, tenant-scoped reports across 13 clinical, operational, and financial domains, with dynamic filters, reusable reports, pagination, and CSV/XLSX exports.
- **Developed a real-time Connection Hub** using Twilio Voice, Video, and Chat, with WebSocket synchronization for teleconsultations, communications, and automated online booking workflows.
- **Integrated an AI-driven Doctor Assistant** through Socket.IO, enabling real-time audio transcription and automated mapping of clinical notes to structured fields.

The Vincent

Mobile Developer

Chile

2025

- **Architected a 59-screen cross-platform municipal health application** with React Native and Expo SDK 53, using typed Expo Router navigation and a layered structure separating routing, domain logic, presentation, and platform adapters.
- **Engineered complete authentication and onboarding flows** for registration, login, OTP account verification, code resend, password recovery, and guest access, with tokens persisted through Expo SecureStore, Zustand, and Axios interceptors.
- Implemented persistent server-state caching with TanStack React Query and AsyncStorage, using controlled freshness and retention policies to improve offline continuity and reduce unnecessary network requests.
- **Built hypertension and diabetes self-management modules** with measurement capture, historical tracking, automated level classification, record deletion, pharmacological guidance, and embedded preventive-care resources.
- Developed community and preventive-care workflows for health workshops, educational videos, program enrollment, medical-exam requests, and medical-center selection.
- Integrated health-access tools including sector and professional maps, medical-center directories, programs, benefits, agreements, contact numbers, external geoportal access, and direct calling.
- Created reusable type-safe forms and UI primitives with React Hook Form, Zod, NativeWind, and custom design tokens, and maintained EAS development, preview, and production delivery for Android and iOS.

LatamEarth
Lead Frontend Developer

Caracas, Venezuela
2023 - 2025

- Developed reusable React and Vue component systems, reducing development time by 15% across the product suite.
- Designed interactive data tables and visualization tools, improving end-user data comprehension and efficiency by 20%.
- Implemented registration workflows, file-management systems, and administrative databases.
- Integrated and maintained APIs with centralized error handling and scalable application patterns.
- Maintained deployment infrastructure for web applications, reducing deployment cycles by 30%.
- Contributed to UX design and interaction improvements across the platform.

Ogrogameshop
Full Stack Architect & Developer

Remote
2022 - 2023

- **Architected a full-stack gaming commerce platform** as a Bun/Turborepo monorepo, unifying a Next.js storefront and admin portal, a NestJS API, and shared TypeScript, Zod, UI, and database packages.
- **Built end-to-end catalog, cart, checkout, and order workflows** for games and gift cards, including stock validation, promotional and purchase-modality pricing, local payment methods, and WhatsApp-ready order summaries.
- Implemented multi-currency pricing for USD, BRL, and VES with scheduled exchange-rate updates, manual overrides, protected base-currency rules, and immutable exchange-rate snapshots per order.
- **Delivered a role-protected administrative platform** for products, inventory, orders, customers, currencies, payment methods, users, and content, with revenue and trend analytics.
- Integrated Cloudflare R2 media storage through presigned uploads and implemented tag-based storefront cache invalidation for fast, consistent catalog and content updates.
- Internationalized the storefront, admin portal, and API in Spanish, English, and Brazilian Portuguese using locale-aware routing, cookie and Accept-Language negotiation, and localized validation errors.
- Established a reliability pipeline with domain and unit tests, isolated PostgreSQL integration tests, Playwright E2E coverage, Docker deployments, Prisma migrations, and CI gates for type checking, testing, and production builds.

Jupiter Suministros C.A.
Web Administrator & Technical Maintenance

Bolivar, Venezuela
2020 - 2021

- Maintained and upgraded company hardware, software, and web systems to improve reliability and employee productivity.

EDUCATION

Universidad de Oriente
Systems Engineering

Anzoategui, Venezuela
2017

SKILLS

- **Frontend:** HTML, CSS, JavaScript, TypeScript, React, React Native, Vue, Next.js, Astro, Tailwind CSS, Redux, Vite.
- **Backend and Data:** Node.js, NestJS, PHP, PostgreSQL, MySQL, Prisma, REST APIs, WebSockets, BullMQ, Redis.
- **Platforms and Tools:** Git, Docker, Playwright, Vitest, Twilio, Expo, i18next.
- **Strengths:** Problem solving, adaptability, decision making, productivity, Agile collaboration, and communication.
- **Languages:** Spanish (native), English (intermediate).
